

CASE STUDY

Chicksgrove Stone

This beautiful historic stone, which graces classic buildings throughout Southern England such as Salisbury Cathedral, is quarried and processed at our recently updated works near Tisbury, Wiltshire.

Chicksgrove Stone has been approved as a suitable alternative for some of the rarer English Limestone's, such as “*Cambridge Clunch*”, “*Reigate Stone*” and “*Malmstone*”

Material Used

Chicksgrove
Random Walling

The properties on this development have been constructed using a mix of Brick, Render and Chicksgrove stone, all of which work in harmony with each other. The stone work construction has all been with a traditional cavity, with no backing block being used.

The site started in February 2012 and is due for completion in the summer of 2014.
