

STROOD STATION

Strood, Kent

Strood Station has undergone a £2.6 million upgrade, and now has a larger booking hall, a new waiting room and better facilities for passengers. This is part of a wider regeneration project for Medway and North Kent.

Pitch Faced Kentish Ragstone from Hermitage Quarry was used for the large purpose-built booking hall. Kentish Ragstone was selected for the external facades of the building so it would be in keeping with the characteristics of other local railway stations within Kent where the stone has historically been used.

FACTS

Gallagher is the last remaining company still quarrying Kentish Ragstone, the most widespread building stone used throughout the South East of England.

To maintain the local character of Kent's architecture, Gallagher's Hermitage Quarry supplies building stone for restoration and new build projects.
