

# Use of Stone in Building Course 2013

Thistle Euston Hotel, London  
18 September 2013

## Introduction

This popular course gives an overview and general knowledge of the design and use of natural stone and takes account of the current needs of those involved in specifying and working with stone. The course gives delegates assistance in selecting and using natural stone in many different uses.

## Areas covered:

- Geology of stone, including selecting and quarrying
- Stone testing, British and European Standards and CE Marking
- Detailing of stone, including working drawings and fixings
- Masonry and architecture, including external masonry and rain screen cladding
- Repairs, restoration and cleaning
- External paving
- Stone for interiors
- Environmental and sustainability of stone

The course is suitable for qualified and trainee architects, designers, specifiers, surveyors, planners, those who have recently entered the stone industry trade and others who wish to achieve a better understanding of natural stone and its use.
