

Stone Federation member Johnstone Quarry Group are looking for two stonemasons permanently based in the banker shop.

It is a fully serviced shop with two water wall LEVS.

They are currently working on two country houses, both in our Cotswold Limestone from two different quarries, with prospective other houses in the pipeline.

They service all our quarries, from the Ironstone, to the Cotswolds and from our Bath Mine.

This opportunity might suit two apprentices who have finished their second year looking to be financed through the third year, which we would provide training to manage this final year.

The company is based in North Oxford, the manufacturing arm of the Johnston Quarry Group.
